MASTER SOFTWARE

EDUCATION

2011.09-2015.07 | Northeastern University | (Bachelor)

Major: Software Engineering
I mastered the basic knowledge of software engineering during undergraduate studies and got excellent grades which enabled me to continue my graduate study in Fudan University.

2015.09-2018.03 | Fudan University | (Master)

Major: Software Engineering
Now, I am engaged in the mobile cloud storage security research at the The FDU Security Lab. Meanwhile, I am involved in a project about cloud storage with Chinese Academy of Sciences. I will graduate in March 2018.

JOB EXPERIENCE

Neusoft | 2014.06-2014.08

Web Development

I got my first internship at Neusoft when I was a junior. My job was to use SSH2 frame to design and implement a CRM (customer relationship management) system with my group. This experience made me a profound understanding of Web development. I also learned how to work with a group which is very important in software development.

Meritco Services | 2015.07-2015.09

Android Development

I got my second internship at Meritco Services (a consulting firm) after getting my bachelor degree. In the meantime, I was involved in the development and testing of two Android projects. The first one named Doctor Panda, an Android application which help patients to make appointments with doctors online. Another one called JuKeTang, an Android application which help people to find and book courses within the city limits. My task was to test these two apps and fix bugs if I could, then wrote a test report. This experience let a have a strong interest in Android development.
